2.0. ARCHITECTURAL WING

Architectural Wing evolves preliminary drawings, detailed plans, elevations & cross sections for construction, considering the utility aspects of the buildings such as office, educational, medical and residential purposes etc. as per the standard norms.

The architect wing is the competent authority for architectural drawings / plans of the drawings and walk through if necessary. The architect wing adds creativity and artistic elements to the building by understanding the limitations and potential of the site, financial targets, realizing different technical difficulties and predicting future expansion opinions and technical ideas and focusing on the aesthetic factors, cost estimation, timescale of the project, barrier free environment, reduction consumption utilizing energy and consuming more natural resources etc the drawing are evolved by the architect. It also included rendering of floor plan, site plan, the elevation and isometric views apart from 2D and 3D views.

3.0. PLANNING AND DESIGN CIRCLE

The foremost essential role of PWD, Planning and Design wing is preparing nominal / appropriate structural drawings for Building execution in compliance to the Indian Standard Code with trending technology utilizing the technical knowledge and practical skill acquired over decades.

3.1. TAMIZHAGA ARASU BUILDING RESEARCH STATION, CHENNAI

In pursuance of providing priority to prime construction materials used in Building construction works, Tamizhaga Arasu Building Research Station, Chennai is issuing enhanced technical proficiency, Research & assessment of construction materials quality of approval for construction material products.

3.2. BUILDING CENTRE AND CONSERVATION DIVISION, CHENNAI

In order to preserve and conserve the Heritage Structures and Archaeological Buildings, the Building Centre and Conservation Division deals with Renovation and restoration of the distressed Heritage Structures without changing the Historic values and Aesthetic looks by adopting the ancient construction methodology by involving the original natural products for adding more value to Heritage Buildings.

3.3. QUALITY CONTROL DIVISION

Quality Control Division will facilitate the process of establishing a centralized Quality Control system in Buildings Organisation.

The Quality Control Wing is necessary to maintain uniformity in the quality control measures, systems and procedures, so as to ensure easy monitoring and control.

Quality Control is the regular inspection system to ensure that the construction of project meets the standards specified in the contract. Quality Control personnel perform the testing and compare the result to the specification requirements. Quality Control includes the following,

- Setting up the standard for construction
- Checking the deviation from standard
- Taking action to correct or minimize the variation
- Improvement of the standard

In almost all the central and public sector organizations quality control wing is functioning.

The benefits of Quality Control wing in Buildings Organisation and Public Works Department ensures uniform quality, reduced expenditure in maintenance works, elimination of reworks, etc.

Presently the Quality Control (Building Organisation) functions with 3 Divisions, 12 Sub Divisions and 46 Sections.

This wing conducts surprise checks / inspections at the project sites during various stages of execution collect samples from the site and conduct test such as Compressive Strength Test, Fineness Modulus and Sieve Analysis for Fine and Coarse Aggregates and for Concrete, test relates to Bricks etc. and the same has been reported to the respective offices and also taking followup action in this regard.

At the United Nations Sustainable Development Summit on 25th September 2015, the 193 Member States adopted 17 Sustainable Development Goals (SDGs) otherwise known as Global Goals build on the Millennium Development Goals (MDG) with 169 targets.

The buildings constructed by department are in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, which looks at inclusion, resource efficiency, mitigation & adaptation to climate change and resilience to disasters.

Preservation of Heritage Buildings by renovating and restoring without damaging Architectural, Aesthetic, Historic and Archaeological values address the targets of Goal 9 (Industry, Innovation & Infrastructure) and Goal 11 (Sustainable Cities and communities).

9.1. Develop quality, reliable, sustainable and resilient infrastructure including regional and trans-border infrastructure to support economic development and human well-being with a focus on affordable and equitable access for all.

11.4 Strengthen efforts to protect and safeguard the world's cultural and natural heritage.

SDG Unit formed in Public Works Department vide G.O. (Ms) No. 36, Public Works (I.Spl.) Department, dated 25.01.2020 is to set up systems and mechanisms for enabling focus to be brought for achievement of SDGs.

6.0. RESTORATION AND RENOVATION OF HERITAGE BUILDINGS

Restoration and Renovation of heritage buildings is a big challenge for Public Works Department. The causes of damage and decay, on the basis of the acquired data based on Historical analysis, qualitative analysis and quantitative analysis are identified. Possible defects related to Historic Buildings may be due to the following reasons:-

- Climatic change
- Air pollution
- Maintenance issues
- Environmental factors
- Temperature fluctuations

After a detailed study on traditional materials, construction techniques and using skilled technicians the works are being carried out in Heritage buildings.

Adopting the above said measures PWD Buildings Organisation executes the renovation and restoration of heritage buildings in the most successful manner which has been well recognized and appreciated.

7.0. RAIN WATER HARVESTING

Considering the importance of rain water harvesting, intensive steps are taken by this department since the year 2002. The various methods of rain water harvesting are

communicated to the field engineers through circulars from this office with the initiatives from this department.

In 50,601 Government Buildings, 62,855 numbers of Rain Water Harvesting Structures have been provided by PWD.

The Government Buildings are fully equipped with Rain Water Harvesting Structures. For the new Buildings constructed from the year 2014 the rain water harvesting structures are included as a mandatory arrangement in the Estimate itself.

The existing structures are often checked and maintained in a regular interval for effective rain water harvesting.

8.0. M-SAND

Manufactured Sand otherwise known as Crushed Stone Sand identified as an alternative to River Sand. M-Sand when produced by proper machines can be used as a better substitute to river sand. Since, M-Sand does not have organic impurities, can be used directly without any wastage. The superior shape and gradation of M-Sand ensures high strength concrete. Hence, the M-Sand is promoted as an alternative to river sand with the following objectives:-

- To prevent damage to environment by rationalizing the use of river sand in a conserved manner.
- The use of M-Sand as an alternative to river sand, reduces the increasing demand of river sand for domestic consumption as well as the scarcity of sand.
- To meet out the deficit in demand and supply situation of sand in the State.
- To encourage the Micro, Small and Medium Enterprises Sector in setting up of manufactured sand units across all districts, to generate employment and effective utilization of resources.

Proposed steps for promoting M-Sand

For promoting the use of M-Sand, PWD, Buildings Organisation is issuing Certification based on the eligibility by making inspection and ascertaining the standards maintained by the Industry. Advertisement is also issued in the interest of public. PWD is also taking all effective steps to promote usage of M-Sand to ensure eco-restoration.

9.0. SCHEDULE OF RATES

Every year, the Standard Schedule of Rates are finalised by the Schedule of Rates Committee and communicated to all the Government departments through PWD for adoption in the estimates for various construction projects and taking decision on the tenders.

Para 116 of Tamil Nadu Public Works Department Code stipulates that, ‘the Schedule of Rates should be prepared on the basis of rates prevailing in the locality and as it is used for the important purpose of preparing estimates and is also used as a guide in setting rates in contract agreements, necessary analysis of the rates for each description of work and the varying conditions, the cost should be given as far as practicable”.

Upto the Financial Year 2000-2001, the Schedule of Rates were updated by the Superintending Engineers of Territorial Circles. Thereafter, as per the suggestion given by the High Level Committee, a separate Committee was created in G.O.(Ms).No. 555, Public Works (G2) Department, dated 17.11.1999 and also in subsequent Government Orders for the annual preparation and revision of Schedule of Rates comprising its Members, namely (1) Engineer-in-Chief, Water Resources Department and Chief Engineer (General), PWD, Chennai-5, (2) Chief Engineer, Water Resources Department, Design
