After completion of verification of the claims received, data entry has to be made followed by scanning of the photos and linking them with the electors data in the data base. The e.rolls Check List will be generated and compared with the Forms received. This will be followed by de-duplication so as to ensure that there is no multiple entry for any elector.

The DEOs have been instructed in the Video Conferencing sessions held with them on the 20th and 21st of April, 2009 to ensure a proper verification of the claims received and not to take up the processing of Forms with incomplete particulars. In the case of new entrants in the age-cohort 18 - 24, birth or school certificate is necessary for evidence of age.
